Figma, Sketch, Zeplin, Storybook.js, Adobe CC

Automation & AI

GPTs, n8n, Make, Klaviyo, iSolved, Miro, Notion, Monday

Frontend

HTML, CSS, JS, Bootstrap Frameworks & Grids, Angular, React, Typescript

Ops & Research

Notion, Monday, Miro, Figjam, Jira, Quant & Qual Platforms (UserTesting, mouseflow, etc), Analytics, more

Experience

UX/Product Design Lead, HR Automation & Intelligent Middleware (Contract)

AspenHR (July 2025 – Oct 2025)

- Automated compliance and provisioning workflows, reducing manual HR processing overhead, reducing manual HR processing overhead across onboarding cycles
- Consolidated fragmented HR tools into unified admin portal across onboarding, termination, and compliance workflows
- Built modular IA and reusable components supporting task tracking, notifications, and audit trails
- Designed structured and conversational UX modes supporting AI-assisted workflow navigation

Senior UX/Product Design, Agentic Workflow Platform (*Contract*)

IBM Design Studio (March 2025 – Jun2025)

- Designed multi-agent workflow builder for enterprise developers and non-technical users
 - Defined end-to-end workflow model (Define → Compose → Preview → Deploy)
 - Created scalable UX patterns for orchestration, debugging, and deployment
 - Integrated AI-assisted recommendations reducing configuration errors
-

Technology & Design Manager, Enterprise Platform Strategy

Globant KSA (Relocation to Saudi Arabia Prep: Oct 2024 – Mar 2025)

- Led cross-functional UX strategy for international digital transformation initiative
 - Developed workflow frameworks and modernization roadmaps
 - Engagement concluded due to shifting client priorities
-

Product & Systems Strategy Lead - M&A Systems Design, CRM, and Sales Automation (*Part-time*)

Seiler Tucker Inc. (Jan 2024 – Apr 2025)

- Migrated CRM and marketing automation stack (Monday, Shopify, Klaviyo, DealRelations)
 - Designed modular automation flows for membership and affiliate programs
 - Built reporting dashboards and documented M&A SOPs and workflows
-

UX/Product Architect, Enterprise Systems Modernization (*Contract*)

Eaton Industries (Jan 2023 – Apr 2023)

- Merged B2B ordering workflows improving distributor transaction completion rates
- Unified design and development systems accelerating feature deployment
- Delivered research-backed recommendations influencing roadmap priorities

UX/Product Design Lead, Enterprise Innovation Systems (Contract)

PepsiCo | Center of Excellence (Mar 2022 – Aug 2022)

- Led UX modernization across procurement and HR platforms
 - Secured funding through structured roadmap workshops
 - Improved internal automation workflows
-

UX/Product Design Lead, E-commerce & Guest Experience Platforms

Carnival Cruise Line (May 2016 – Nov 2019)

- Led ecommerce redesign contributing to 25% increase in pre-cruise purchase conversion
 - Reduced cruise check-in-related service calls by ~80% through workflow redesign
 - Rebuilt enterprise design system with integrated ADA compliance
 - Accelerated front-end delivery through reusable component alignment
 - Improved loyalty enrollment via SSO and integration redesign
-

UX/Product Design Lead, Digital Booking & Operations Platforms

Magellan Jets (Jul 2020 – Nov 2021)

- Reimagined booking system shifting toward customer self-service
 - Directed UX redesign across web and mobile platforms
 - Designed automated tools for passenger support and real-time flight updates
-

Senior UX/Product Designer, Healthcare Operations Systems

Chen Medical (Oct 2013 – May 2016)

- Reduced physician documentation time through workflow automation
- Streamlined billing and service workflows improving clinic efficiency
- Designed internal portals improving task clarity and service access
